

Art, Urbanism and Architecture in Bosnia and Herzegovina

As recipients of the RIBA Boyd Auger Scholarship 2008/09 Stefanie Rhodes, Shamoan Patwari and Bo Tang explore the impact of the emerging cultural production on architecture and urbanism in Bosnia and Herzegovina. In doing so, they combine academic research with informal interviews and the organisation of small events to produce an overview of the issues faced by those hoping to reshape the cities in the region for the better.

The exhibition presents the photography produced in collaboration with artist and photographer Susanne Ludwig.
